Education

10/2024 – present
Ariana Soghra, Tunisia

Software Engineering
TEK-UP University

10/2020 – 06/2023
Kairouan

Bachelor's degree in computer systems engineering
ISSAT Kairouan

Skills

Programming Languages :
Python, Java, JavaScript, PHP, SQL

Technologies:
Docker, Kubernetes, MySQL, PostgreSQL, N8N

Databases:
MySQL, PostgreSQL, Firebase

Tools:
IntelliJ IDEA, PyCharm, VS Code, PhpStorm

Soft Skills:
Stakeholder Management, Communication, Team Collaboration

Professional Experience

06/2026
Coworky ,Nabeul

Software Engineering Intern
Delivery Optimization

- Developed a full-stack **delivery optimization platform** using **Java Android, React, Spring Boot, PostgreSQL, and Python AI**.
- Implemented **real-time driver tracking, Cargo Fit optimization, product categorization, and route visualization**.
- Integrated **Firebase, Retrofit, Axios, and MapLibre** for synchronization, APIs, notifications, and maps.

08/2025 – 09/2025
Coworky ,Nabeul

Project Intern
n8n workflow

• Designed and implemented N8N workflows to automate data extraction from 7 sources
• Reduced query processing time by 8 minutes per request
• Improved accuracy and reliability of AI-generated statistics

02/2023 – 05/2023
ISSAT Kairouan

Intern
End of study project

• Developed a Smart Irrigation System improving plant health by 15%
• Built mobile application using Android Studio (Java/XML)
• Integrated Firebase authentication and real-time database
• Programmed ESP8266 microcontroller and designed system circuitry

Projects

10/2025 – 05/2026 **Ecommerce Admin Dashboard**
Technologies: *Spring Boot, Angular, Mysql, Kubernetes*
Developed and deployed a containerized e-commerce application using Spring Boot, Angular, MySQL, Docker, and Kubernetes. Implemented JWT authentication, RESTful APIs, ingress-based routing, Kubernetes services/secrets, and scalable microservice-style deployment architecture

02/2026 – 03/2026 **Recover+ Recovery management**
Technologies: *Angular, Expressjs, MongoDB*
Development of a secure API (JWT, roles) under Express.js/MongoDB to manage customers, unpaid invoices, manual payments and collection actions, with Swagger documentation and unit testing.

10/2025 – 01/2026 **Smart Agricultral Assistant**
Technologies: *React, Firebase, Arduino, Docker,Jira, Github*
- Built a smart farming system using **React, Spring Boot, Firebase, Arduino, and Docker**.
- Developed a **Spring Boot backend** to expose REST APIs and handle application logic and data management.
- Implemented **real-time monitoring and automated irrigation features** using IoT sensors and Arduino.
- Integrated **Firebase** for real-time data synchronization and cloud services.
- Containerized application components using **Docker**.
- Used **Jira and GitHub** for Agile project management, version control, and team collaboration.

10/2025 – 12/2025 **Real Estate Rental Management Platform**
Technologies: *Symfony, PHP, MySQL, Doctrine ORM, GitLab CI/CD.*
- Built a rental management web application with admin and client dashboards using Symfony.
- Implemented property, tenant, contract, and payment management features.
- Integrated authentication, authorization, and database management with Doctrine ORM.
- Automated development workflows through a GitLab CI/CD pipeline.

Certificates

Python Certified Associate Programmer (PCAP) – Python Institute

Red Hat Certified System Administrator (RHCSA) – Red Hat

Red Hat Certified Engineer (RHCE) - Red Hat
Red Hat

Red Hat Certified in Cloud-Native Application
Red Hat

Organisations

01/2022 – present
Maamoura, Nabeul
Association AVEC (Association volontariat échange culturel et action des jeunes)
Active member

01/2023 – 01/2024
Maamoura, Nabeul
JCI Maamoura
Medias Responsable

11/2024 – 12/2025
Ariana Soghra, Tunisia
IEEE TEK-UP SB
Webmaster
